

MK4 Alternator Cable Instructions

Always refer to a factory repair manual when working on your car.

Make sure you have your radio code.

Disconnect the ground cable from the battery.

Remove the factory alternator harness.

Remove the factory alternator cable from the harness.

Attach the new alternator cable to the factory harness with tie raps supplied.

Reinstall the alternator harness.

Remove the nut from the factory alternator cable (fuse box terminal) to use to attach the new cable to the fuse box.

Attach the negative battery cable.

You now can reset your radio code.

Thank you,

Gary
